

### MGT-317: Disaster Management for Public Services

#### Description:

The Disaster Management for Public Services provides a unique opportunity for public service professionals to extend their knowledge and skills necessary for protecting their communities and infrastructure from potential or actual threats. During this course, participants work together in multidisciplinary teams to apply the course information with their professional experience in a variety of hands-on, small group activities and disaster scenarios.

This course brings together representatives from public service agencies such as utilities and public works, transportation, fire, public safety, city planning/urban development, public health, and local, state, and federal emergency management officials who are expected to identify and mitigate hazards and plan and manage disaster response and recovery efforts within their jurisdictions.

#### Course Objectives:

- Identify threats to public services
- Examine disaster planning and management principles for incidents affecting public services
- Explain methods for preventing, protecting against, and mitigating disasters
- Determine appropriate response actions to incidents affecting public services
- Develop information for presentation to the public and media during an incident
- Discuss the responsibilities of public services disaster recovery
